SUMMARY:

I am a first-year Computer Science Engineering student at SRMIST KTR, specializing in Artificial Intelligence and Machine Learning. I am passionate about solving real-world problems through web development and AI-driven solutions. With expertise in the MERN stack, I have built responsive applications and explored data science and machine learning using Python. I am eager to contribute to projects in web development, AI/ML, and data science while continuing to grow and learn.

EXPERIENCE:

Tech Member - Liftoff | Sept 2024 – Present

Liftoff is a product accelerator at SRMIST that mentor's students in product development, design, and marketing, enabling hands-on experience, collaboration, and networking to build impactful side projects.

Technical Team Member- SRMKZILLA | Nov 2024 – Present

SRMKZILLA is a technical club at SRMIST, part of Mozilla Clubs, promoting skills through open-source projects, web development, workshops, and technical fests while enhancing members' technical and event management abilities.

Technical Team Member- Newton School Coding Club | Nov 2024 – Present

Newton School Coding Club (NSCC) at SRMIST fosters a vibrant coding culture, offering workshops, projects, and networking opportunities to empower students with technical skills and bridge the gap between academics and industry.
